France

A stylized map of France is centered on a dark blue background with a fine, diagonal line pattern. The map is filled with a slightly darker shade of blue and is outlined with a thick, bright yellow line that follows the coastlines. The text is overlaid on the left side of the map.

Gray Version

We propose 3 different version for regular orders.  
We can do , also, all the possible colors and materials for chassis, frontplate and side parts

Inox Version

Bleue stone Version

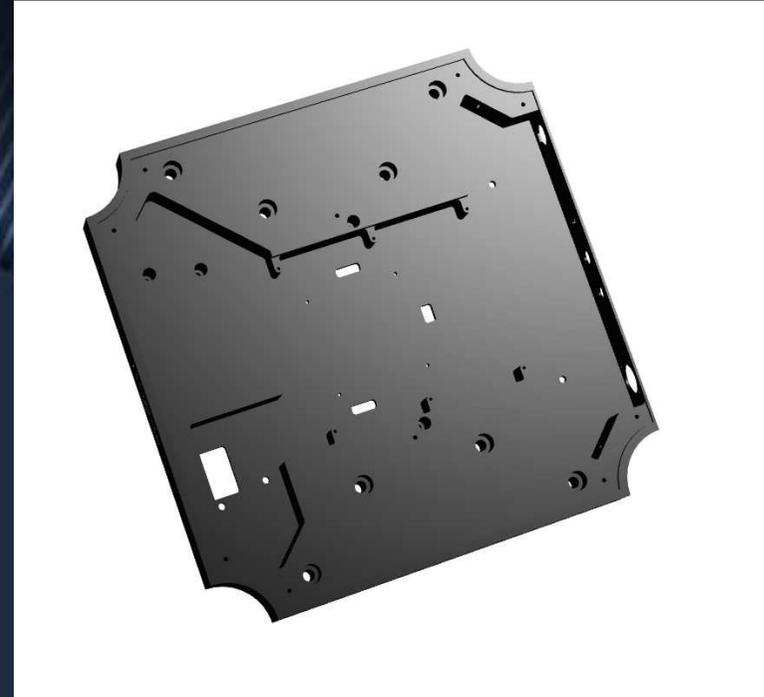

Based on Philips CDM12ProII mechanism, this new drive is equipped with the last and well known CD technologies. It also provide special digital signal on special connectors. These digital signal are specially designed to feed our future DSP controled DAC  
It also equipped with a regular 24bits/96KHz SRC which can be bypassed by a switch located on the rear of the unit  
Of course, you will find the three regular digital connectors : SPDIF on RCA, AES/EBU on XLR and optical on ST connector\*

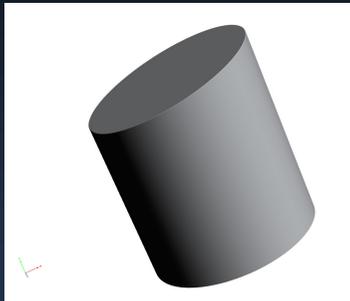

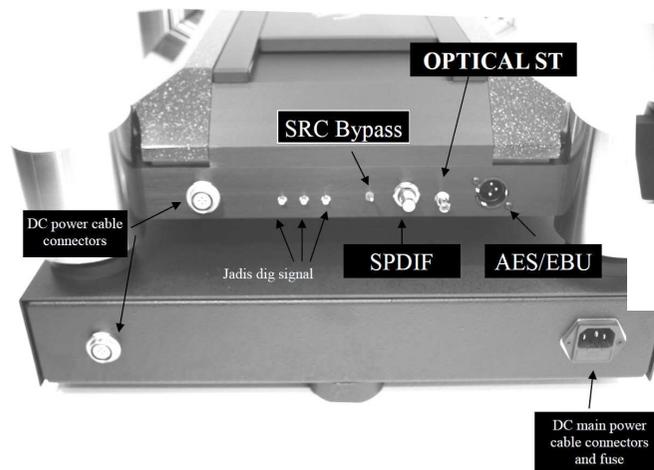

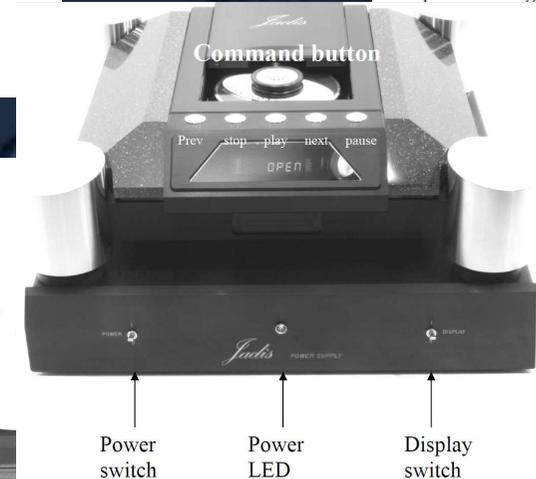

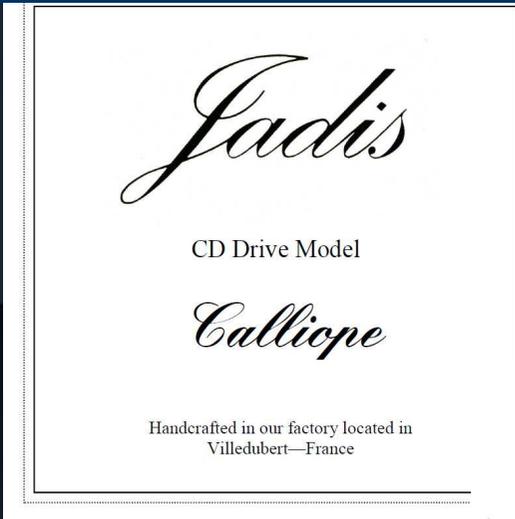

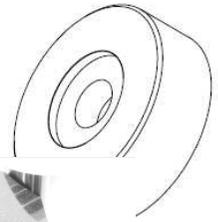

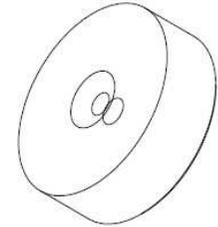

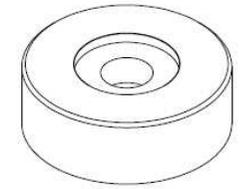

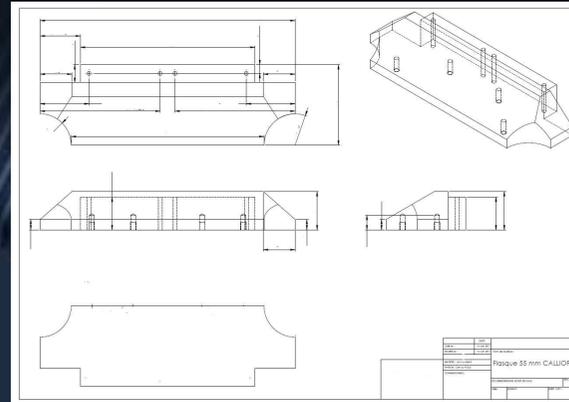

A quite strong power supply with traditional power transformers ensure to drive the best power feeding possible allow it to control all its power needs.

All the mechanical parts are machined with best available materials. The heavy weight materials ensure the best laser reading possible to void reading mistakes by cancelling mechanical vibrations

To finish, this drive is the best replacement to our famous JD1 Technologies, design, materials make it one of the best sounding CD drive ever built. This is the result of 30 years of experiment and research. The CD is not dead
